Locker locks and accessories

Part Number:
KEYLESS360-SN-ADA

Standard Finish:
Satin Nickel

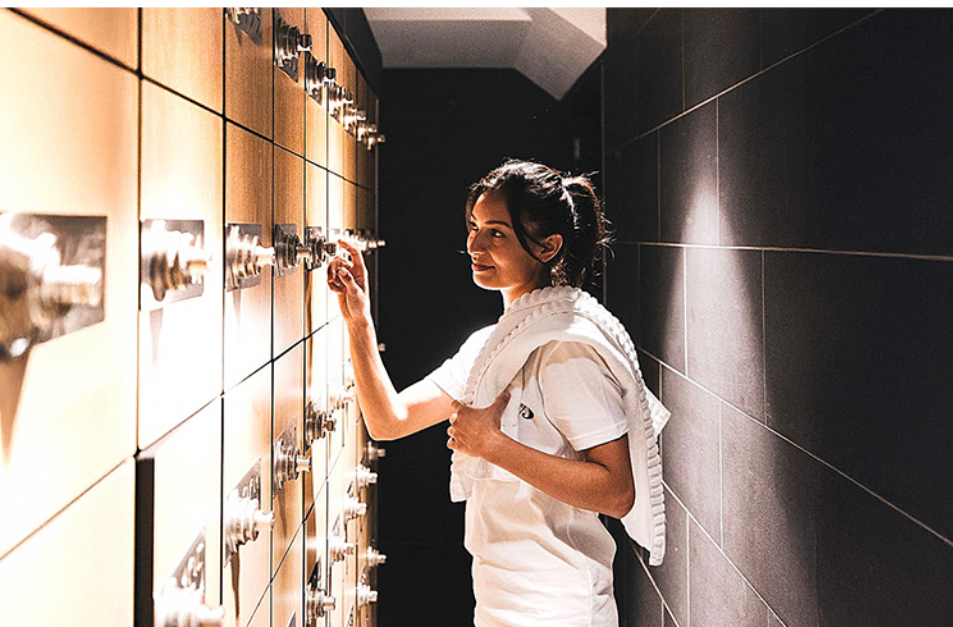

Part Number:
KEYLESS360-MB-ADA

Premium Finish:
Matte Black

Part Number:
KEYLESS360-MW-ADA

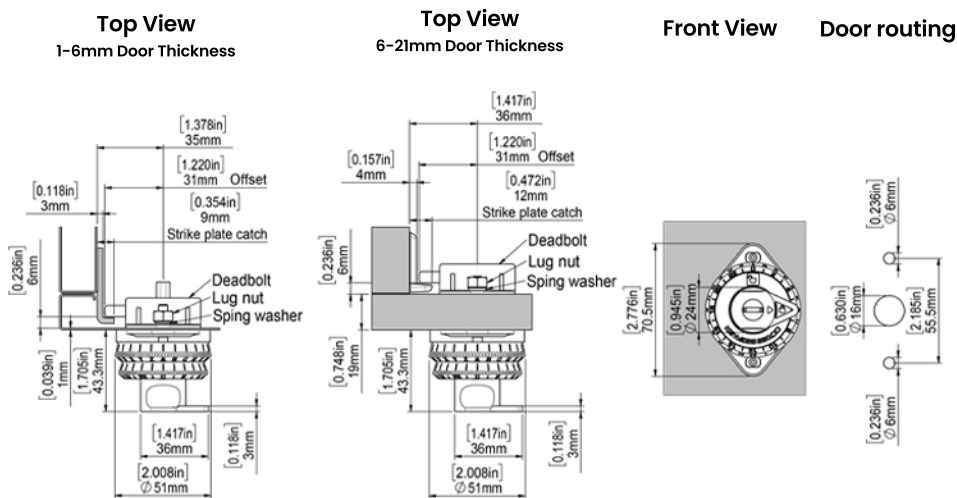

Premium Finish:
Matte White

FEATURES & BENEFITS

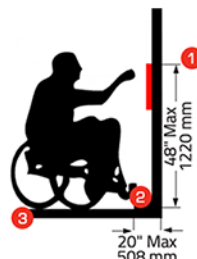

- **Battery-free combination lock** requiring only a simple 2-digit alphanumeric code. Suitable for both shared and assigned use.
- **Versatile master key** performs three functions from the front: code bypass, code retrieval, and lock reset.
- **Reprogrammable lock cylinder** enables easy rekeying when a master key is lost or stolen- simply insert the new master key to automatically reprogram the cylinder (patented design).
- **Anti-pick and tamper-resistant** construction features a self-correcting, breakaway knob for added protection against forced entry (patented solution).
- **Fully ADA/DDA compliant** for accessibility.
- **Contributes to two LEED v4 credits**, supporting sustainable building goals.
- **Ergonomic, non-slip handle** rotates 90 ° (from 12 to 3 o'clock) and is usable on both left and right-hand lockers; clear lock/unlock status indicator is visible from a distance.
- **Rated IP69K**, providing complete resistance to dust and water- ideal for both wet and dry environments.
- **Durable all-metal construction**, built for heavy use and long life; covered by a 5-year comprehensive warranty.
- **Large, easy-to-read dials** with ample spacing minimize accidental lockouts. Digits are 5mm tall and don't fade.
- **Industry's strongest latch/bolt** resists forced entry. Available in a deadbolt catch design.
- **Compatible with a wide range of locker materials** including wood, glass, metal, plastic, and phenolic (1-21mm door thickness).
- **Surface mount** design installs easily with just two screws.
- **Easily retrofits** from most locks on most locker doors. "The Ultimate Retrofit Lock"

DIMENSIONS

2016 ADA STANDARDS FOR ACCESSIBLE DESIGN

- 5% of lockers and their operable parts, the locks, must meet ADA specifications.
- Locks shall be operable with one hand.
- Shall not require tight grasping, pinching, or twisting of the wrist to operate.
- Shall have a force required to activate of 5lbs (22.2N) maximum.
- Locks shall be installed maximum 48.00"/1220mm from the floor surface.

- 1 Highest touch point
- 2 Front Edge of block
- 3 Top of finished floor

MANAGER INSTRUCTIONS

Code Bypass

Allows manager access without obstructing user's code.

- 1 When lock is locked, insert the Master Key.
- 2 Turn the knob to  and access the locker, then close the door.
- 3 Return the knob to the  position, and remove the key.

*Locker will remain locked and code will remain the same.

Code Retrieval & Reset

Allows manager to retrieve forgotten user's code and reset code for new user.

- 1 When lock is locked, insert the Master Key and turn the knob to .
- 2 Spin each dial until it stops. After setting each dial, the last user's code will display.
- 3 Turn the knob back to  and remove the key. Then, return the knob to  and scramble the dials for the next user.
